

Georgia Lions Lighthouse Foundation

presents: *“Night of Spectacles”...and what a night it was!*

Georgia Eye Partners continues its commitment to charity care by participating in Night of Spectacles 2010. Sponsored by the Georgia Lions Lighthouse Foundation, Night of Spectacles is an annual fundraiser event in the Georgia community. Various prizes are auctioned off and GEP was proud to continue its yearly tradition of donating a LASIK procedure, to be performed by one of our renowned cornea specialists, Dr. Eugene Gabianelli.

This year was thrilling for GEP as one of our own clinical directors, Candace Miller, competed in the fundraiser's fashion show. The challenge of the fashion show was to create a wearable outfit out of spectacles, and Candace did an outstanding job. She created a Victorian dress, complete with accessories and a parasol, out of various eye glass components. The result was stunning!

The proceeds from Night of Spectacles go towards various indigent eye care projects. Many of our own patients have benefited from Lions Lighthouse by receiving spectacles or financial aid for surgeries. Currently, Lions Lighthouse is working on a project to deliver eye care to rural Georgia through a mobile eye care vehicle. Many patients with limited access to healthcare have already been helped, and we hope to be able to help many more.

We at Georgia Eye Partners take our responsibility to provide quality eye care to Georgians seriously. We are proud to participate in such an exciting and beneficial charity endeavor. Next year, one of our own doctors, Dr. Parul Khator, will be on the Night of Spectacles committee, and GEP has future plans to chair the event.
